

Very rarely do we get the opportunity to work with people who in the short spell of in less than a year, do so much for us that they become unforgettable for life.

Dear Asok Kumar ji,

You have literally changed the face of HUDA. And the future of its people!

You took one look at the grand building that houses our office premises and decided to give it a much needed facelift. Today its re-discovered splendor is due to your efforts, and your vision. The antique bird bath fountain that you installed in front of the office, the old annex that you got removed, the interiors that you modernized, all these made us proud...all these made us happy.

As if it was not enough to rekindle our pride in working with HUDA, you addressed our main concern, and ensured that our future was protected.

We have seen you at work, Asok ji. And admired not just your punctuality, but also the way you found time for each and every visitor. The way you listened to every complaint, every suggestion. And we were not surprised when you converted the front office into a grand lobby that not just looks like a Consulate, but works like it.

Your focus on Customer Care was but an extension of your People Care policy, and it is a fitting testimony to your concern that in the short spell of just about one year, so many projects saw the light of the day. It is no wonder that most of us feel that in this year, we have had more than just 365 sunrises.

By insisting on world class facilities for children at every park, you showed that your concern for the next generation was genuine. By starting work early in the morning you showed us how good it was to always be on our toes.

By accelerating the inauguration of prestigious projects like the Lumbini Laserium, the Telugu Talli Flyover and Langer Houz Lake you proved that you were a person with great initiative. And also that you had the bigness of heart to take forward good ideas even if they were not originally your own.

Other interventions from your side saw the Master Plan for Hyderabad going into the next phase of Government's approval. Saw the Outer Ring Road moving from concept to reality. Saw the greening of Hyderabad take on a more aggressive shade.

The layouts that came up in Hyderabad during your tenure adhered to the strictest guidelines, and created benchmarks in the industry, and gave the colonies and layouts a fresh, green, modern international look. All this because you sincerely believed that an essential part of HUDA's mission was to improve the Quality of Life of the citizens of Hyderabad.

While the common man of Hyderabad, who has greatly benefited from your initiatives may not know that it is you behind their new found comfort, style and convenience, we your erstwhile colleagues at HUDA recognize and acknowledge the fact that a lot of good that has happened in our city and in our lives is due to your action, direction and inspiration.

We take this opportunity to thank you for leading by example, for driving us towards excellence with passion and thank you once again for giving our future the solidity of a dream realized, and the security of a promise kept.

We wish you all the best in your new assignment, and hope that your future is as green as that of the cityscape that you helped create.

Your HUDA team. Your grateful HUDA family.
